QUALITY PHARMA PRODUCTS PVT.LTD

Address : Lahoal Industrial area,Dibrugarh,786010

Date:29/10/2022

Introduction :

Educational excursions are of great value for the students of science. The theoretical knowledge earned by a student about a living things such as plants and animals remains limited and incomplete. But if the students study this living things in their natural condition the knowledge will be increased. Therefore to acquire complete knowledge about the natural habit , habitat and animals which are found in a particular are of climate and physical conditions one must go through there natural existence and in their natural environment.

As a science of living beings it has a wide range of study. so ,one cannot summaries all these things at a time. So an area is selected within a time limit within this area study the habit , habitat, temperature etc. Such as specific study helps us to record different habit and habitats of various specific plants and animals also to understand the ecological interaction prevelling in the area.

Industrial visits are usually the first point of interaction between a student and a live working industry. The students learn about the latest technology trend and make up their minds about their future jobs or area of interest.

selection of place :

In course of industrial tour we visited QUALITY PHARMACEUTICAL INDUSTRY. It is situated in the district of Dibrugarh of Assam. This industry is rich for the manufacturing of antibiotics.

Address: Lahoal Industrial Area,
Dibrugarh-786010

On 29th October 2022 We started our journey from Titabor chariali at 6.0am .We reached Demow after 2.45 hour and that place we took breakfast which was sponsored by Dr. Nazim Forid sir. After breakfast we started our journey and we arrived in the industry at 10.45 am. After arrival we were waiting for permission and our Pranab and Nazim sir were going to take permission. After getting the permission we entered to the industry. We met the manager of the industry. He is very intelligent person and he told us about the industry.

After this we entered inside the industry and we changed our dress .A special apron was worn which was gifted by the industry manager. This industry has three floors. After this we visited the whole industry. The industry manager informed

us and told the different types of instruments and their functions. The industry manager and two industry employees helped us to know about the machine and the function, procedure and the packing system. We saw autoclave, spectrophotometer, oven etc. We saw a microbiology laboratory. We can't capture any photographs inside the industry because it is totally prohibited by official.

After the industry visit we changed our apron and went to outside the industry. Then we took cup tea with biscuits which was sponsored by industry manager. After this we returned from the industry and we took lunch in a hotel. After took the lunch we started our return journey from that hotel at 1.15pm. We reached our home town at 8.30 pm.

Conclusion:

Industrial visit is one of most important source of acquire knowledge and I have no hesitation to say that it is apart and the pencil of the education system. It always suppliment our theoretical knowledge. BACON says "*TRAVELLING IN THE YOUNGER IS A PART OF EXPERIMENT*" The industrial visit which have undertaken helped me to realize reality of the statement by BACON. During the course of industrial visit we have studied various instruments of microbiology.

I am convinced that such a industrial visit as a whole it really helpful to the students in general to these have to Botany as a disciple of their study in particular.
